Grow Beyond Numbers

EPF CALCULATOR

CURRENT-RULE & PRODUCT ACCURACY RECORD

Internal Governance Record

Audit / Review Period	10 September 2026 (read-only current-rule audit, then same-day correction)
Final Production Checkpoint	10 September 2026, 03:34:13 IST
Git Commit	9134e6e 9134e6ef67e5c48de7553755cd9b1d845dc3ae41
Commit Message	Correct EPF calculator for current statutory assumptions
Branch	main

This document is an internal FOINWI governance and product-accuracy record. It is not marketing material, legal advice, a filing tool, or a certification. It does not claim that the calculator is legally certified, government approved, CA certified, regulator approved, or permanently accurate.

1. Purpose of Record

This internal record documents the completed FOINWI current-rule and product-accuracy review for this calculator only. It records calculator scope, the regulatory/current-rule review, formula review, assumptions, discrepancies discovered, corrections implemented, validation evidence, remaining limitations, authoritative sources used, and the Git production checkpoint.

- Record the read-only EPF current-rule audit and the subsequent educational-estimator correction.
- Record statutory contribution-wage ceiling, EPS diversion out of corpus, and illustrative interest labelling.
- Preserve unread Scheme 2026 clauses and FY 2025-26 interest NOT DEFINITELY NOTIFIED.

2. Product Scope

What this calculator does

- Educational EPF accumulation estimate for a standard already-enrolled EPF/EPS member in a general 12% establishment.
- Deterministic statutory-ceiling contributions: $\text{contributionWage} = \min(\text{monthly PF wages}, \text{Rs } 15,000)$.
- Splits employee EPF 12%, employer total 12%, EPS 8.33%, residual employer EPF, all on the contribution wage.
- Projects corpus using employee EPF + residual employer EPF only; EPS is diverted out of the projected EPF balance.
- Applies a visitor-editable illustrative annual interest assumption, default 8.25% labelled FY 2024-25.

What this calculator does not do

- Not an EPFO passbook or year-end crediting engine.
- Does not model 10% classes, VPF, higher-wage contribution, higher-pension joint option, or new joiner > Rs 15,000 with no EPS.
- Does not model EDLI, administrative charges, withdrawals, tax, or payroll wage reconstruction.
- Does not treat FY 2025-26 interest as a Government-notified rate.
- Does not quote unread Employees' Provident Fund Scheme, 2026 clauses as if they were read.

3. Pre-Correction State

- Employee contribution modelled as 12% of full salary-like input without the Rs 15,000 ceiling in the default statutory mode.
- Employer EPF presented as 3.67% on that full amount, which the audit found is only the residual on the same wage EPS uses.
- Default illustrative interest 8.15%, which was not the last verified Government-approved FY 2024-25 rate (8.25%).
- No centralized epfRules / epfEngine. Validator duplicated or tautologically checked contribution math.
- At the then-default Rs 30,000, statutory-ceiling EPF credits were roughly doubled relative to a ceiling-capped model.

4. Current-Rule Audit Findings

Findings below are from the retained read-only EPF current-rule audit, then the correction report.

P0 Stop $\text{fullSalary} \times (12\% + 3.67\%)$ above the ceiling. Default statutory mode must use $\min(\text{PF wages}, 15,000)$.

P0 Split display: employee EPF 12%, employer total 12%, EPS 8.33%, residual employer EPF - all on contribution wage. 3.67% is not "the employer contribution".

- P0** Change default illustrative rate from 8.15% to 8.25%, labelled FY 2024-25 last notified/approved rate. Do not present FY 2025-26 as notified.
- P1** Position under Code on Social Security, 2020 + current EPFO operational treatment. Do not claim Scheme 2026 changed the 12/8.33/3.67 split until Gazette text is read.
- P1** Dedicated epfEngine + real validator importing production logic.

Uncertainties preserved from the review

- FY 2025-26 EPF INTEREST RATE NOT DEFINITELY NOTIFIED IN SOURCES FOUND (CBT-recommended 8.25%; final Government notification not located in the audit).
- G.S.R. 525(E), 29 June 2026 Scheme 2026 e-Gazette PDF could not be retrieved (server 500); contribution paragraphs were not read from Gazette text.
- No fresh Gazette substituting twelve per cent under Code s.16 was found; 12% is modelled as current EPFO operational treatment, with 10% classes out of scope.

5. Authoritative Basis

The sources below were used during the completed review. This section is a record of that review. It is not a fresh regulatory reinterpretation.

Government of India / Ministry of Labour & Employment - Code on Social Security, 2020 - s.16 (10%/12% structure; EPS not exceeding 8.33%); s.2(89); s.164 repeal/savings
 Dates: Code commencement 21 November 2025
 URL: <https://www.labour.gov.in/static/uploads/2025/07/b0620548445580767b5c0d18c95c26f7.pdf>
 Supported: Governing statute for Chapter III contributions after repeal of EPF & MP Act, 1952.

Gazette of India - S.O. 2702(E), 29 May 2026 - Chapter III wage ceiling Rs 15,000 per month
 Dates: 29 May 2026
 URL: <https://egazette.gov.in/WriteReadData/2026/273002.pdf>
 Supported: Statutory contribution-wage ceiling used in the default estimator.

PIB / Gazette citation - Employees' Provident Fund Scheme, 2026 issued as G.S.R. 525(E) dated 29.06.2026
 Dates: 29 June 2026 (PIB 12 July 2026, PRID 2283802)
 URL: <https://www.pib.gov.in/PressReleasePage.aspx?PRID=2283802>
 Supported: Scheme 2026 issued; unread clauses were not quoted as product rules.

EPFO - Circular 26.05.2025 - FY 2024-25 interest 8.25% approved under para 60(1)
 Dates: 26 May 2025
 URL: https://www.epfindia.gov.in/site_docs/PDFs/Circulars/Y2025-2026/DeclarationOfROI_2024_25.pdf
 Supported: Last Government-approved/notified interest rate verified for the default illustrative assumption.

PIB - PRID 2234502 - CBT recommends 8.25% for FY 2025-26 to be notified; approves Scheme 2026
 Dates: 2 March 2026
 URL: <https://www.pib.gov.in/PressReleasePage.aspx?PRID=2234502>
 Supported: FY 2025-26 rate remained recommendation / to be notified in sources found.

EPFO - FAQ - 12% / 8.33% / 3.67%; Rs 15,000; VPF; new joiner >15k no EPS; monthly running-balance interest
 Dates: Retrieved during the audit
 URL: http://epfindia.gov.in/site_en/FAQ.php
 Supported: Operational split used for the standard-member educational case.

Blogs and commercial calculators were not used as regulatory authority.

6. Final Production Formula

```

contributionWage = min(monthlyPFWages, 15000)
employeeEPF = roundContribution(contributionWage x 12%)
employerTotal = roundContribution(contributionWage x 12%)
employerEPS = roundContribution(contributionWage x 8.33%)
employerEPF = employerTotal - employerEPS
monthlyEpfCredit = employeeEPF + employerEPF // EPS excluded from corpus
Each month: add monthlyEpfCredit, then apply (illustrativeAnnualRate / 12) to the running balance
Rounding: nearest rupee, Rs 0.50 or more up; rates as 12/100 and 833/10000

```

Variables

Variable	Meaning
monthlyPFWages	Visitor-entered monthly PF wages; may differ from Basic
contributionWage	min(PF wages, Rs 15,000) in the default statutory mode
employerEPS	Diverted to EPS; not added to projected EPF corpus
illustrativeAnnualRate	Visitor-editable; default 8.25% labelled FY 2024-25

Timing and method assumptions

- Simplified monthly running-balance approximation with a constant illustrative annual rate.
- Not presented as EPFO year-end crediting.
- 12% described as current EPFO operational treatment, not as a freshly notified Scheme 2026 rate.

7. Final Rules / Assumptions

Material production assumptions are classified below. Statutory / official rule is distinguished from a FOINWI product assumption and from an illustrative user-editable assumption.

Class	Assumption
STATUTORY / OFFICIAL RULE	S.O. 2702(E) Rs 15,000 Chapter III wage ceiling in the default contribution calculation.
STATUTORY / OFFICIAL RULE	Code s.16 structure: employee and employer contributions; EPS diversion not exceeding 8.33% where the member is an EPS member.
FOINWI PRODUCT ASSUMPTION	General 12% operational treatment for a standard 12% establishment; 10% classes out of scope.
FOINWI PRODUCT ASSUMPTION	Unread Scheme 2026 clauses are not quoted; higher-wage / VPF / no-EPS joiner paths out of scope.
ILLUSTRATIVE USER-EDITABLE ASSUMPTION	Interest rate default 8.25% FY 2024-25; not guaranteed; not FY 2025-26 notified.

8. Corrections Implemented

Correction 1

Old: Full PF-wage (or salary-like) base x 12% employee and 3.67% employer EPF; no Rs 15,000 ceiling.

Corrected: $\text{contributionWage} = \min(\text{PF wages}, 15000)$; 12%/12% with EPS 8.33% diverted; residual employer EPF only in corpus.

Reason: Current-rule / trust: ceiling and residual math.

Correction 2

Old: Default 8.15% interest presentation.

Corrected: Default 8.25%, labelled illustrative FY 2024-25 last verified approved/notified rate.

Reason: FY 2025-26 was not treated as notified.

Correction 3

Old: Tautological validator; no production engine import.

Corrected: `epfRules + epfEngine`; `validate:epf` imports the engine. 260 checks passed.

Reason: Architecture / regression hardening.

9. Deterministic Test Vectors

The vectors below were executed against the production engine in the calculator validator. No unexecuted tests are listed.

Inputs	Expected	Actual / validated	Result
PF wages Rs 10,000	wage 10,000; employee 1,200; employer 1,200; EPS 833; employer EPF 367	As correction report	PASS
PF wages Rs 15,000	wage 15,000; employee 1,800; employer 1,800; EPS 1,250; employer EPF 550	As correction report	PASS
PF wages Rs 30,000	contribution wage stays 15,000; same as Rs 15,000 row	Ceiling applied	PASS
Rounding 1.49 / 1.50 / 1249.50	1 / 2 / 1250	Half-up rule	PASS
Browser (correction report)	Default Rs 30,000 shows 1,800 / 1,800 / 1,250 / 550 / 2,350	Recorded in the correction report	PASS

10. Validation Evidence

Check	Recorded result
<code>validate:epf</code>	Passed 260 checks
<code>validate:calculators</code>	Passed (EPF calls the real engine)
<code>validate:trust</code>	Passed
<code>validate:hardening</code>	Passed
<code>lint</code>	Passed
<code>build</code>	Passed

Test limitations

- Correction report also recorded a browser check of default Rs 30,000 and Rs 10,000 contribution split.
- Scheme 2026 Gazette text remained unread; validators cannot prove unread clauses.

11. Remaining Limitations

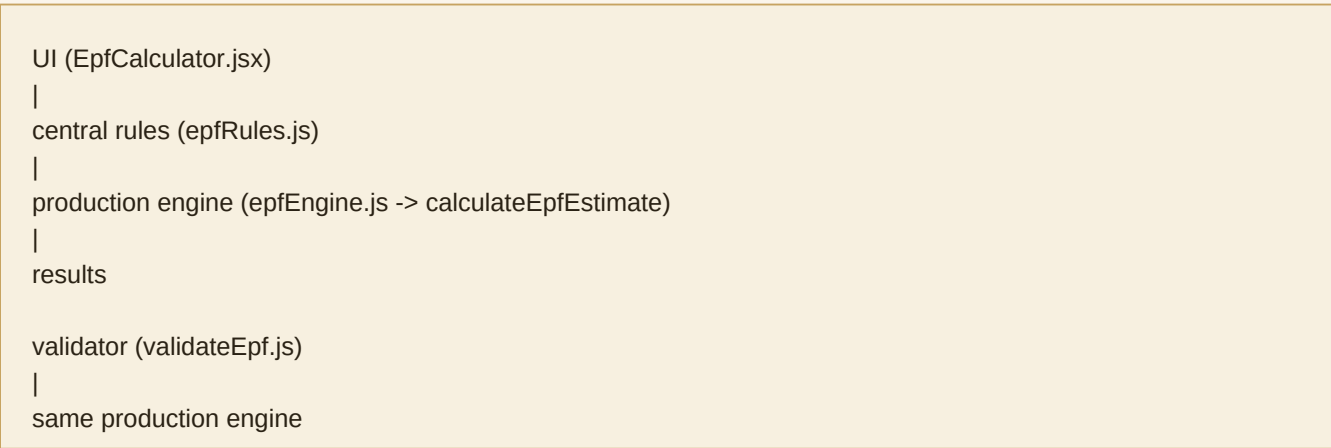

This section is mandatory. It records what this calculator deliberately does not model. It protects FOINWI from overclaiming.

- 12% is operational, not re-read from Scheme 2026 Gazette clauses.
- FY 2025-26 interest still not treated as notified.
- No VPF / higher-wage / 10% / no-EPS joiner modes.
- Projection is an educational approximation, not EPFO year-end crediting.
- PF wages are visitor-supplied; no payroll add-back.
- EDLI, admin charges, tax, and withdrawals are not modelled.

12. Trust & User-Communication Standard

- Educational estimate; not a passbook; not guaranteed returns.
- Interest labelled illustrative; FY 2024-25 last verified rate; visitor-editable.
- EPS diversion disclosed; residual employer EPF only enters corpus.
- 10% classes, higher-wage, VPF, and no-EPS joiner disclosed as outside scope.

13. Architecture

- Validation imports production contribution and projection logic.

14. Change Record

Calculator	EPF Calculator
Audit date	10 September 2026 (read-only current-rule audit, then same-day correction)
Correction date	10 September 2026, 03:34:13 IST
Final Git commit hash	9134e6ef67e5c48de7553755cd9b1d845dc3ae41
Commit message	Correct EPF calculator for current statutory assumptions
Branch	main
Relevant production files	src/utills/epf/epfRules.js; src/utills/epf/epfEngine.js; src/components/EpfCalculator.jsx; scripts/validateEpf.js; scripts/validateAllCalculators.js; package.json (validate:epf); src/utills/calculatorFormat.js (8.25% display); src/data/calculatorInsights.js; src/data/calculatorExplains.js; src/data/calculators.js

Validator	scripts/validateEpf.js
Validation command	npm run validate:epf

Final Git commit 9134e6e verified from git log.

15. Final Status

FOINWI INTERNAL PRODUCT ACCURACY STATUS

Checkpoint	Status
Current-rule audit completed	YES
Correction completed	YES
Production engine validated	YES
Regression checks passed	YES
Known limitations documented	YES

Status reflects the rules, assumptions, sources and production checkpoint documented in this record. Regulatory and statutory requirements may change after the recorded review date.

This record does not state that the calculator is 100% legally accurate, permanently compliant, government certified, or error-free forever.
