PPF CALCULATOR

CURRENT-RULE & PRODUCT ACCURACY RECORD

Internal Governance Record

Audit / Review Period	10 September 2026 (read-only current-rule audit, then same-day correction)
Final Production Checkpoint	10 September 2026, 18:45:02 IST
Git Commit	0b8c461 0b8c4618e1d785659b047d783c4f3468c402713a
Commit Message	Correct PPF calculator assumptions and trust wording
Branch	main

This document is an internal FOINWI governance and product-accuracy record. It is not marketing material, legal advice, a filing tool, or a certification. It does not claim that the calculator is legally certified, government approved, CA certified, regulator approved, or permanently accurate.

1. Purpose of Record

This internal record documents the completed FOINWI current-rule and product-accuracy review for this calculator only. It records calculator scope, the regulatory/current-rule review, formula review, assumptions, discrepancies discovered, corrections implemented, validation evidence, remaining limitations, authoritative sources used, and the Git production checkpoint.

- Record the educational PPF accumulation estimate and the current-rule review of Scheme 2019 timing, limits, and rate labelling.
- Preserve that e-Gazette PDFs of G.S.R. 915(E) and G.S.R. 290(E) were NOT DEFINITELY VERIFIED.
- Record the on-or-before-5-April annual model versus official 5th-day lowest-balance interest.

2. Product Scope

What this calculator does

- Educational PPF accumulation estimate using an annual contribution assumed deposited on or before 5 April of each financial year.
- Applies a constant illustrative interest-rate assumption, default 7.1% for 1 July-30 September 2026 as the last retrieved notified default.
- Enforces deposit limits Rs 500 to Rs 1,50,000 in multiples of Rs 50.
- Models 15 contribution years as the standard scenario.

What this calculator does not do

- Not an official PPF passbook or a personal statutory maturity-date calculator.
- Does not model loans, withdrawals, premature closure, missed years, or extension-block eligibility.
- Does not lock today's rate for 15 years and does not compute tax benefits.
- Does not adjudicate Form-4 5-year continuation blocks.

3. Pre-Correction State

- Primary result presented as implied-certain Maturity Value rather than Estimated PPF balance.
- Promotional title "Build long-term wealth with PPF"; "expected interest rate" wording.
- Rate not clearly labelled as an illustrative assumption that Government-notified PPF rates can change, including quarterly.
- UI step Rs 500 versus scheme multiples of Rs 50; extension years slider 16-50 without Form-4 adjudication.
- Validator duplicated futureValueOfAnnualDeposits and did not import production logic.
- Tax-efficient / 80C-linked journey copy overclaimed relative to regime-dependent tax treatment.

4. Current-Rule Audit Findings

Findings from the retained read-only PPF audit. e-Gazette qualifications are preserved.

P0 Relabel primary result Estimated balance; replace promotional title; label rate as illustrative; disclose Government-notified rates can change quarterly.

P0 Disclose on/before 5 April deposit timing; no loans/withdrawals; tenure is contribution years, not the statutory FY-end maturity rule.

P1 Dedicated ppfRules + ppfEngine; validator imports the engine; align step with Rs 50 multiples; dated 7.1% default for Jul-Sep 2026.

P2 Optional monthly vs annual timing and FY-end maturity explainer were not required for P1.

Uncertainties preserved from the review

- e-Gazette PDFs of G.S.R. 915(E) and G.S.R. 290(E): NOT DEFINITELY VERIFIED (not opened as Gazette files). Provisions were taken from NSI compiled scheme text.
- NSI scheme PDF HTTP 500 this session - NOT DEFINITELY VERIFIED as PDF.
- India Post scheme PDF 404 this session - NOT DEFINITELY VERIFIED as PDF.
- DEA Q2 OM dated 30.06.2026 says rates remain unchanged and does not reprint a PPF line; 7.1% number is from NSI official tables consistent with those OMs.

5. Authoritative Basis

The sources below were used during the completed review. This section is a record of that review. It is not a fresh regulatory reinterpretation.

National Savings Institute (compiled scheme text) - Public Provident Fund Scheme, 2019 - G.S.R. 915(E), 12 December 2019, as amended G.S.R. 290(E), 5 May 2020
 Dates: 12 December 2019; amendment 5 May 2020
 URL: https://www.nsiindia.gov.in/InternalPage.aspx?Id_Pk=169
 Supported: Scheme limits, 5th-day lowest-balance interest, FY maturity rule - retrieved as NSI compilation, not as opened e-Gazette PDFs.

Department of Economic Affairs - F.No.1/4/2019-NS dated 30.06.2026 - Q2 FY 2026-27 rates remain unchanged from Q1
 Dates: 30 June 2026; period 1 July 2026 - 30 September 2026
 URL: https://dea.gov.in/files/budget_division_documents/Q2ROI.pdf
 Supported: Quarterly small-savings OM; does not itself reprint a PPF line.

National Savings Institute - Scheme-wise rates table; PPF interest history 01.04.2020 TO 30.09.2026 -> 7.1
 Dates: Retrieved 10 September 2026
 URL: https://www.nsiindia.gov.in/InternalPage.aspx?Id_Pk=132
 Supported: Numeric 7.1% used as the default illustrative assumption for Jul-Sep 2026.

Department of Economic Affairs - Government Savings Promotion General Rules, 2018 - G.S.R. 1003(E), 5 October 2018
 Dates: 5 October 2018
 URL: http://dea.gov.in/files/budget_division_documents/GSPR.pdf
 Supported: Parent general rules; 1968 PPF scheme repealed with savings.

Blogs and bank sites were not used as regulatory authority.

6. Final Production Formula

balance = 0
 for each of 15 contribution years:
 balance = balance + annualContribution
 if rate > 0: balance = balance + balance x illustrativeAnnualRate
 At 0%: estimated balance = annualContribution x contributionYears
 This annual shortcut matches official 5th-day lowest-balance interest when the full yearly amount is in by 5 April and the selected rate is held constant.

Variables

Variable	Meaning
----------	---------

annualContribution	Rs 500 to Rs 1,50,000, multiples of Rs 50
illustrativeAnnualRate	Visitor-editable; default 7.1% for 1 July-30 September 2026
contributionYears	Locked to 15 in production; not a personal FY-end maturity date

Timing and method assumptions

- Full yearly contribution treated as deposited on or before 5 April.
- Interest credited once a year in this model; not monthly compounding.
- Deposits after the 5th, or monthly deposits, typically produce a lower estimate and are not modelled.

7. Final Rules / Assumptions

Material production assumptions are classified below. Statutory / official rule is distinguished from a FOINWI product assumption and from an illustrative user-editable assumption.

Class	Assumption
STATUTORY / OFFICIAL RULE	Scheme 2019 deposit limits Rs 500-Rs 1,50,000 per FY in multiples of Rs 50 (as retrieved from NSI compiled text).
STATUTORY / OFFICIAL RULE	Official interest uses lowest balance between close of 5th day and month-end, credited annually.
STATUTORY / OFFICIAL RULE	Statutory maturity is 15 complete financial years from the end of the opening financial year - disclosed, not computed as a personal date.
FOINWI PRODUCT ASSUMPTION	On-or-before-5-April annual shortcut; one account; uninterrupted deposits; no loans/withdrawals.
FOINWI PRODUCT ASSUMPTION	Contribution years locked to 15; extension blocks not modelled.
ILLUSTRATIVE USER-EDITABLE ASSUMPTION	Interest rate; default 7.1% dated Jul-Sep 2026; Government-notified rates can change quarterly.

8. Corrections Implemented

Correction 1

Old: Maturity Value; promotional wealth title; expected rate; Rs 500 step; 16-50 year extension slider.

Corrected: Estimated PPF balance; illustrative rate with quarterly-change disclosure; Rs 50 step; 15 contribution years locked; extension not modelled.

Reason: Trust / current-rule wording and product-scope honesty.

Correction 2

Old: Validator duplicated the formula; did not import production.

Corrected: ppfEngine imported by validatePpf.js. 163 checks passed.

Reason: Architecture.

9. Deterministic Test Vectors

The vectors below were executed against the production engine in the calculator validator. No unexecuted tests are listed.

Inputs	Expected	Actual / validated	Result
Rs 500, 7.1%, 15 years	Audit target Rs 13,561	Engine Rs 13,561	PASS
Rs 1,00,000, 7.1%, 15 years	Audit target Rs 27,12,143 (Rs 10 tolerance)	Engine Rs 27,12,139 (Rs 4 IEEE gap)	PASS
Rs 1,50,000, 7.1%, 15 years	Audit target Rs 40,68,215 (Rs 10 tolerance)	Engine Rs 40,68,209 (Rs 6 IEEE gap)	PASS
Rs 1,50,000 @ 0%	Rs 22,50,000	Rs 22,50,000	PASS

10. Validation Evidence

Check	Recorded result
validate:ppf	Passed 163 checks
validate:calculators	Passed
validate:trust	Passed 32 checks
validate:hardening	Passed 15 checks
lint	Passed
build	Passed

Test limitations

- Live browser click-through was not possible: the IDE browser and a local HTTP fetch could not reach localhost:5173. Copy, labels, and engine behaviour were verified through validators and source.
- Rs 4 / Rs 6 gaps versus audit targets are IEEE float rounding, not a different model.

11. Remaining Limitations

This section is mandatory. It records what this calculator deliberately does not model. It protects FOINWI from overclaiming.

- Not a passbook / 5th-day monthly engine for arbitrary deposit dates.
- No personal maturity date (no opening-date input).
- No 5-year extension-block modelling.
- No loans, withdrawals, defaults, or aggregation math.
- No tax estimate.
- Constant illustrative rate, not a path of future notified rates.

12. Trust & User-Communication Standard

- Illustrative accumulation estimate; not an official passbook; not a promise of what will be paid.
- Rate labelled illustrative; Government-notified PPF rates can change, including quarterly.
- Deposit-timing and annual-credit method disclosed.
- Tax treatment depends on applicable income-tax rules and regime; calculator does not estimate tax benefits.

13. Architecture

- Validation imports calculatePpfEstimate rather than reimplementing the annuity-due loop.

14. Change Record

Calculator	PPF Calculator
Audit date	10 September 2026 (read-only current-rule audit, then same-day correction)
Correction date	10 September 2026, 18:45:02 IST
Final Git commit hash	0b8c4618e1d785659b047d783c4f3468c402713a
Commit message	Correct PPF calculator assumptions and trust wording
Branch	main
Relevant production files	src/utils/ppf/ppfRules.js; src/utils/ppf/ppfEngine.js; src/components/PpfCalculator.jsx; scripts/validatePpf.js; scripts/validateAllCalculators.js; package.json (validate:ppf); src/data/calculatorExplains.js; src/data/calculatorInsights.js; src/data/calculators.js; src/data/journeys.js; src/intelligence/knowledge/financialConcepts.js
Validator	scripts/validatePpf.js
Validation command	npm run validate:ppf

Final Git commit 0b8c461 verified from git log. Pre-work HEAD was 9134e6e (EPF correction).

15. Final Status

FOINWI INTERNAL PRODUCT ACCURACY STATUS

Checkpoint	Status
Current-rule audit completed	YES
Correction completed	YES
Production engine validated	YES
Regression checks passed	YES
Known limitations documented	YES

Status reflects the rules, assumptions, sources and production checkpoint documented in this record. Regulatory and statutory requirements may change after the recorded review date.

This record does not state that the calculator is 100% legally accurate, permanently compliant, government certified, or error-free forever.
